Create a New Override

Language
English (en-GB) [en-GB]

Location
Administrator

Language Constant *

Text

For Both Locations
☐

File
/home/cibl/cibl.ru/docs/administrator

Search text you want to change.

A language string is composed of two parts: a specific language constant and its value.
For example, in the string: COM_CONTENT_READ_MORE="Read more: "
'COM_CONTENT_READ_MORE' is the constant and 'Read more: ' is the value.
You have to use the specific language constant to create an override of the value.
Therefore, you can search for the constant or the value you want to change with the search field below.
By selecting the desired result the correct constant will automatically be inserted into the form.

COM_JOOMGALLERY_CONFIG_GS_IP_GDLIB_NO_VERSION

GD appears to be installed, but we can not verify the version. Check the HELP » SYSTEM INFO » PHP INFORMATION screen to verify your GD installation and version.

COM_MEDIA_FIELD_CHECK_MIME_DESC

Use MIME Magic or Fileinfo to try to verify files. Try disabling this if you get invalid mime type errors.

COM_SOCIALLOGIN_EMAIL_REGISTERED_WITH_ADMIN_ACTIVATION_BODY

Hello %s , \n \n Thank you for registering at %s using Social Login. Your account is created and must be verified before you can use it. \n To verify the account click on the following link or copy-paste it in your browser: \n %s \n \n After verification an administrator will be notified to activate your account. You'll receive a confirmation when it's done. \n Once that account has been activated you may login to %s using the following username and password: \n \n Username: %s \n Password: %s \n OR you can also login with your selected social login provider.

COM_USERS_CONFIG_FIELD_USERACTIVATION_DESC

If set to None the user will be registered immediately. If set to Self the User will be emailed a link to activate their account before they can log in. If set to Administrator the user will be emailed a link to verify their email address and then all users set to receive system emails and who have the permission to create users will be notified to activate the user's account.

JFTP: :_verifyResponse: Timeout or unrecognised response while waiting for a response from the server. Server response: %s

PLG_GMAIL_FIELD_VERIFYPEER_DESC

Verify the peer connection using a CA certificate. In some situations authentication will fail due to certificate issues, disabling this should resolve the situation in that case.

PLG_GMAIL_FIELD_VERIFYPEER_LABEL

Verify Peer

PLG_RECAPTCHA_ERROR_INVALID_REQUEST_COOKIE

The challenge parameter of the verify script was incorrect.

PLG_RECAPTCHA_ERROR_INVALID_SITE_PRIVATE_KEY

We weren't able to verify the secret key.

PLG_RECAPTCHA_ERROR_INVALID_SITE_PUBLIC_KEY

We weren't able to verify the site key.

PLG_RECAPTCHA_ERROR_RECAPTCHA_NOT_REACHABLE

Unable to contact the reCAPTCHA verify server.

PLG_RECAPTCHA_ERROR_VERIFY_PARAMS_INCORRECT

The parameters to verify were incorrect, make sure you are passing all the required parameters.

PLG_TWOFACTORAUTH_TOTP_STEP3_TEXT

To verify that everything is set up properly, please enter the security code displayed in Google Authenticator in the field below. Afterwards, please save your user profile. If the code is correct, the Two Factor Authentication feature will be enabled.

PLG_USER_JOOMLA_POSTINSTALL_STRONGPW_TEXT

As a security feature, Joomla allows you to switch to strong password encryption.
To turn strong passwords on select the button below. Alternatively you can edit the User - Joomla plugin and change the strong password setting to On.
Before enabling you should verify that all third party registration/login, user management or bridge extensions installed on your site support this strong password encryption.

COM_KUNENA_RECAPTCHA_ERROR_RECAPTCHA_NOT_REACHABLE

Unable to contact the CAPTCHA verify server. Please try again after a moment.
